- The CSWC made notifications per SOP.
- Cal OES Duty Officers have been advised and will continue to monitor the situation.

WEATHER OF CONCERN

Weather of Concern

- An upper-level low will approach the Bay Area from the south on Monday. This low will have sufficient moisture with it and will increase shower and thunderstorm chances on Monday and Tuesday.
- Afternoon thunderstorms will be possible across the Sierra north to Lassen Park this weekend. The primary threats will be frequent lightning and heavy downpours
- A cutoff low pressure system over the Central Coast will drift southward Sunday into Monday. The low will draw moisture into Southwest California from the southeast, resulting in a risk of showers and thunderstorms across the areas Sunday and Monday. The highest thunderstorm chances will be Sunday afternoon through Sunday night. The storms may produce heavy downpours and flash flooding, gusty and erratic winds, and dangerous lightning. Strong thunderstorms will be possible, which will be capable of producing hail showers and wind gusts over 50 mph...in addition to heavy rain.

Active Weather Warnings, Watches and Advisories by County:

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

Rather moist weather anticipated the first half of this week

Higher pressure with warmer, drier conditions will be over the North Ops region today into Monday. Some afternoon cumulus buildups are expected over the mountains, but any chance of an afternoon or evening thunderstorm will just be near Tahoe. There will be some light to moderate NE to E winds in some areas tonight into early Monday with relatively poor to moderate RH recovery. Afternoon highs today and Monday will be about 10 degrees above normal with the warmest inland areas around 100.

A low off the southern California coast will move north Monday and bring isolated afternoon and evening showers or wet thunderstorms back to the region later in the day and overnight. Showers and isolated wet thunderstorms associated with that low will continue Tuesday through well into Wednesday night and could occur anywhere in the Geographic Area. Thursday a low pressure trough will move into the region from the NW off the Pacific. There will continue to be a chance of lingering showers or isolated thunderstorms over the eastern mountains Thursday, but next Friday and Saturday look dry in all areas. Temperatures will cool to more seasonable values midweek onward with the warmest inland valleys in the mid 80s to lower 90s. Some gusty south to west winds are expected to develop later this week as that stronger trough moves into the region.

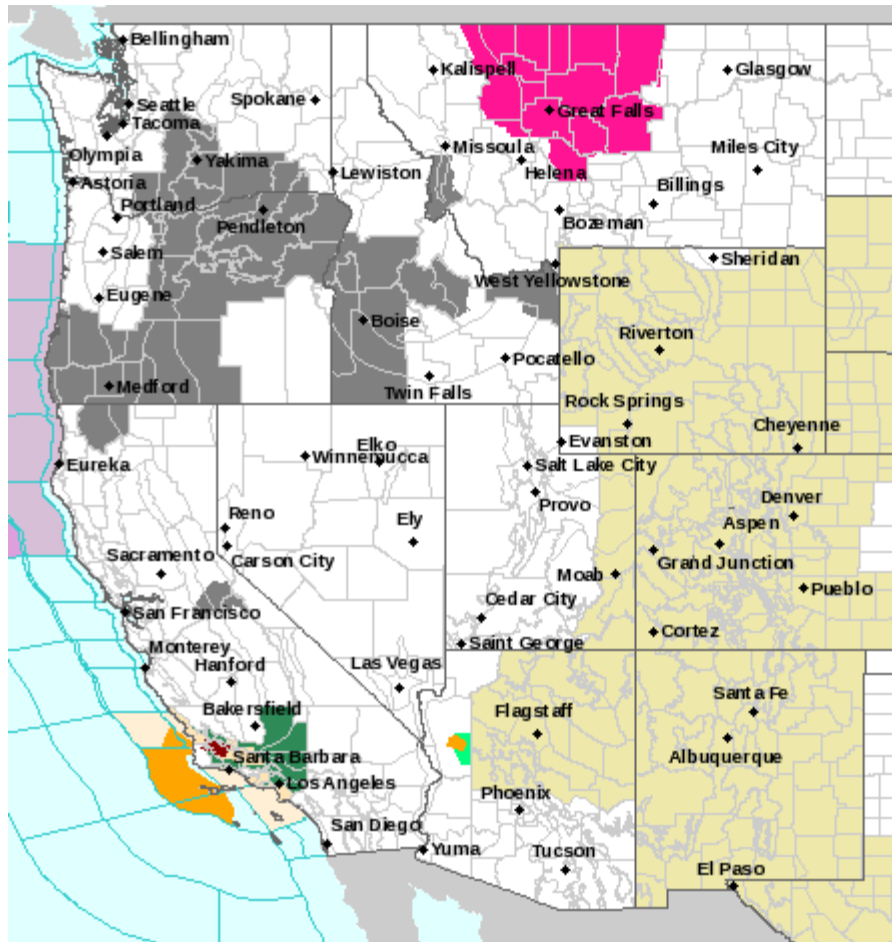

SOUTHERN CALIFORNIA

Scattered showers and thunderstorms through Wednesday

An area of low pressure currently off the Southern California Coast will bring scattered showers and thunderstorms to the region this afternoon through Wednesday afternoon. Most locations will receive between 0.10 and 0.50 inch of rainfall through the middle of this week, but some mountain and desert locations will receive an additional 1 to 2 inches of rainfall. There will be little change in the near normal temperatures through Tuesday, with mid 70s to mid 80s across the mountains and mid 80s to mid 90s in the valleys. Temperatures will cool to 5 to 10 degrees below normal Wednesday through the end of this week as the low pressure off the California Coast moves inland and a Pacific trough follows. Minimum humidity will be above 20% across the region through the end of this week. There will be gusty westerly winds during the afternoons and evenings across the wind prone mountain and desert areas Wednesday through the end of this week.
